TITLE : FACSIMILE EQUIPMENT

ABSTRACT : PURPOSE: To realize facsimile equipment capable of using the function of one- touch key most suitable for each of plural operators by providing a means to input a user ID, and a means to store inputted telephone number and various kinds of user information in accordance with a user.

CONSTITUTION: The one-touch registration of a transmission destination is performed by inputting an ID decided proper to each operator by using ten keys after depressing the user ID input key of a display operating part. Thence, a correspondent mode is selected by depressing the function key of the ten keys. The telephone number of an opponent on whom the one-touch registration is desired to perform is inputted by using the ten keys, and a one-touch key to register the telephone number of the opponent is selected and depressed. One-touch transmission is performed by inputting the ID decided proper to each operator by using the ten keys after depressing the user ID input key of the display operating part. After that, a transmission original is set and the one-touch key in accordance with the telephone number of the opponent desired to transmit is depressed.
